

VENTILATION EQUIPMENT FOR SANITATION

BVG series Air box

Characteristics

- Our BVG Air box, is a useful tool for the ventilation and extraction of gases and bad odors from manholes and inspection conduits.
- It comes equipped with plastic pipes reinforced with steel.
- When folded down it is just 0,5 m. long and when unfolded it becomes a 10 m. long self-extinguishing conduit.
- The Air box comes with an airflow regulator and can be supplied with handrails and wheels.
- Peak flows range goes from 1,500 m³/h to 11,000 m³/h.
- Optionally, for flammable gas environments (i.e. methane) we can supply the Gas Exhauster equipped with spark-proof fan and flame-proof engine.
- Double Function: Air Blower & Air Exhauster

Model	Flow m ³ /h	Power Watts	CASING MEASURES								Peso
			A	B	C	D	E	F	G	H

Before using any of our ventilation equipment, you must check that there aren't any flammable gases where the equipment is going to be used. If they are flammable gases, you have to first use the CVG Series – Sparkproof.
